## Steps to Enable VNC acceptance on Device VIA LTM .

 Below are the steps to Enable VNC Acceptance at client end (On Device):

1. Log on to LTM Server.

2. Select group or node on which Enable VNC Acceptance needs to be enabled.

3. Go to **Administration > Remote Agent > Advanced Settings**.
3.1 In Remote Agent tab, Enable the **Enable VNC acceptance** option and **click on Apply.**

4. Thus, on enabling the above setting, when VNC task is applied, a confirmation pop up is available in following manner at client end (**On device**). The task will get succeeded when clicked on OK and it will be listed in VNC Notification menu on Server.

Note: VNC acceptance setting is applicable only when we take the VNC by applying the task on the device via Context Menu or Device List Context Menu.
